

Background

Patients face many hurdles in order to find affordable ways to get their prescription medications, especially those who take multiple medications to treat multiple medical conditions. Due to the rising cost of prescription medications, patients taking multiple drugs are more inclined to go to multiple sources to get medicines at the best price.

About the Program

MEDHELP is a free program where NOVA ScriptsCentral leverages its decades of experience to help patients identify safe affordable ways to get their prescription medications. Individuals can submit an online inquiry via the website and NSC team will respond in 2 business days to help individuals identify the best options to save money and where they can go to get their medicines based on where they live.

Who We Serve

We serve anyone in the country who submits an online request to help find an affordable medication.

Services Provided

Response in 2 business days

Identify the top 3 options to help them save money and where they can go to get their medicines.

Learn ways to navigate different discount programs such as GoodRx and RefillWise.
